The Information Disclosure Statements submitted on 10/20/03 and 03/21/03 have been considered. Documents relating to litigation have been reviewed but not cited because the information is not prior art.

Following are new grounds of rejection.

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-4 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-16 of prior U.S. Patent No. 6,406,715 B 1 (Cefali). This is a double patenting rejection. The reference shows an intermediate release nicotinic acid formulation administered once a day for treating hyperlipidemia without causing drug induced hepatotoxicity, elevations in uric acid or glucose or both. The formulation is the same as in the Cefali reference. See column 14, Tables 1A-1C. The release profiles would inherently be the same as in applicants' claims because the formulations are the same.
